Installing Adobe Creative Cloud (CC) -Apple computers

| Step	Action
1.	You need to uninstall any of the Adobe Suite products that are installed on your computer which is any app that says Adobe EXCEPT Adobe Air, Adobe Flash Player, and Adobe Shockwave. Begin by removing any local Adobe Suite Software by opening Finder, selecting the Adobe products and dragging them to the trash can. If you don't have any Adobe products, skip to step 5.
2.	Open the Trash Can, select those files > Right click > Delete Immediately
3.	When prompted "Are you sure?" choose Delete

|		
4.	Finder will prompt you for your credentials to delete those programs. Enter your Domain name and password	
	Finder wants to delete 4 items immediately. Enter your password to allow this. User Name: [ ] Password: [ ] Cancel OK	
5.	Begin the Adobe CC installation Start by **closing** any products that use **Adobe** products such as **Outlook** and any of the **Microsoft Office Products.** Then navigate to https://www.adobe.com/.
